SERVICE INTERRUPTION: Valley Dale Water System - Scheduled Water Main Leak Repair

Valley Dale Water System - Scheduled Water Main Leak Repair

Please be advised:

Monday, May 1, 2023 a leak repair will be made on Forest Valley Rd water main.

We do not anticipate a need to shut down the water system in order to complete the repair, however, there is always a possibility. If a temporary shut down is needed you may experience no or low water pressure and possible discoloration upon service being restored. We recommend running a faucet or outside spigot to clear the line.

Customers can contact the Dutchess County Water and Wastewater Authority at 845-486-3601. Sign up for email notifications at www.dcwwa.org on the System Alerts and Advisories page.

If you would like to be notified of Alerts and Advisories via our Phone Call Emergency Notification System, send your name, phone number, look-up number from your bill, and the name of your water system to: DCWWA@dutchessny.gov
